

Conservation Parks Vision

The Buckhead Collection

Conservation Parks Vision + Guiding Principles

The Buckhead Collection proposes that all natural areas in Buckhead be planned, designed, and managed to generate multiple objectives including:

- Protect natural resources
- Improve water quality
- Encourage passive recreation
- Promote environmental education
- Sustain or enhance wildlife habitat (in patches or corridors)
- Protect and restore floodplain
- Link natural lands in a greenway system

Where ever possible and appropriate, natural areas should provide opportunities for passive recreation + education including:

- Multi-purpose trails, nature trails, boardwalks
- Picnic areas
- Environmental education + interpretation
