

Cultural + Historical Resources Vision

The Buckhead Collection

Cultural + Historical Resources Vision + Guiding Principles

The Buckhead Collection proposes that all cultural and historical sites be physically connected and integrated into the greenspace system wherever possible, through land acquisition, signage, exhibits, bikeways, trails, and digital media.

Cultural and historical resources and events should be interpreted and communicated throughout the greenspace system to 'tell significant Buckhead stories' such as early settlement events, civil war battles, rural agriculture, natural systems, and/or others.

Buckhead Historical + Cultural Resource

Integration of Historical + Cultural Resources to the Greenspace System

Physical Design + Interpretive Signage

Bike + Segway + Walking Tours

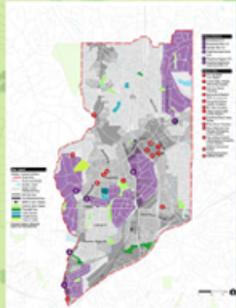

Public Art

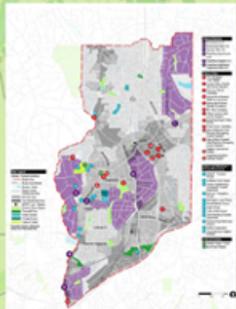

Digital Media + Digital Applications

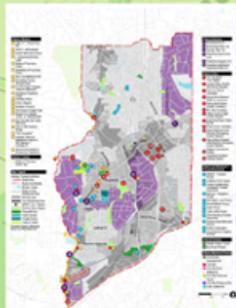

Analysis

Existing Historic District + Historic Sites

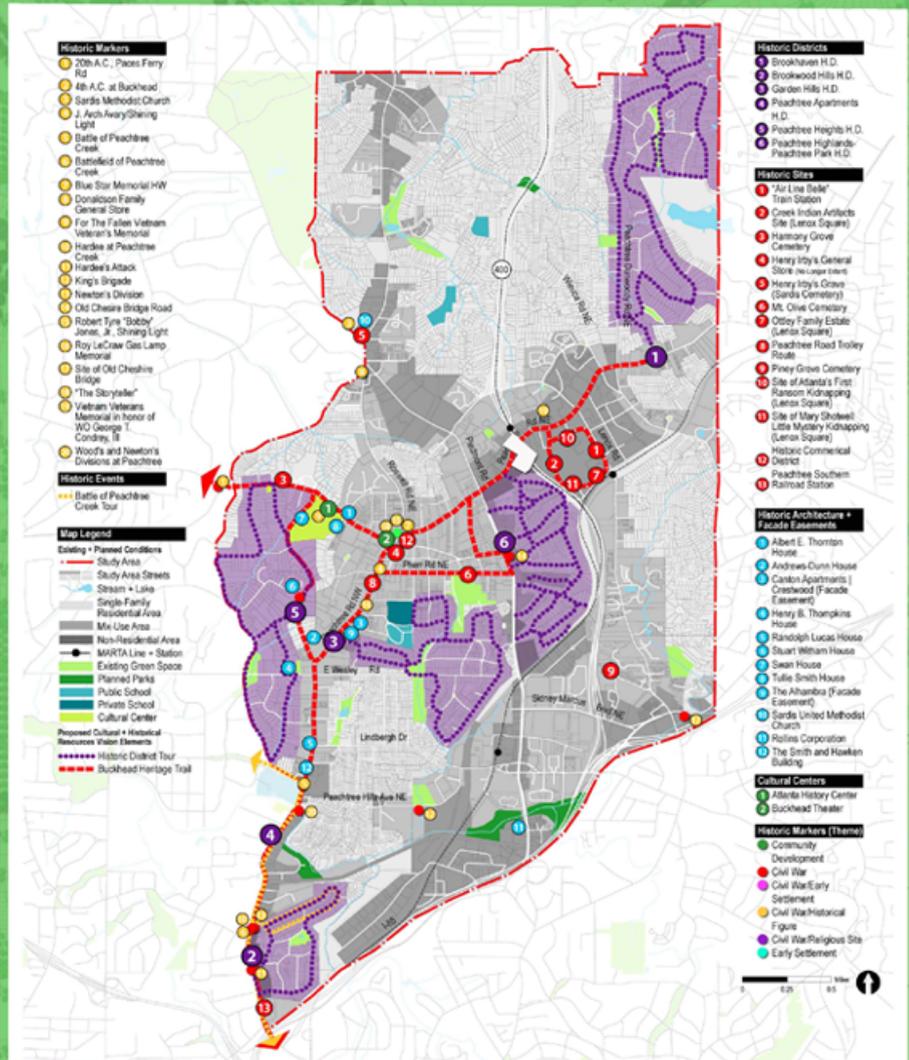

Existing Historic Architecture + Cultural Centers

Existing Historic Markers + Historic Events
